CHICAGO.

Wisconsin Election.

The Milwaukee papers of yesterday assure their readers that Payne's majority is, as far as heard from, over ten thousand, and that it will be considerably increased by the official returns. The rout of the anti-States' Rights Party is complete.

Council Proceedings.

The new Council has got fairly at work, and on the third page of this paper we present a complete record of its doings. Several of the ordinances proposed—the one in relation to tearing up the paving on any street hereafter to be paved, for the purpose of getting at gas and water pipes, in particular—are of great importance and will repay attention.

Foreign News.

Recent advices from Europe warrant the belief that the existing difficulties will be settled in the Congress about to assemble, and that no appeal will be made to physical force; though the tenor of the dispatches does not indicate any great confidence on the part of the European capitalists in the long continuance of peace. Austria continues her work of preparation for war—a fact which will quicken the defences of France.

A TWO-BARRELLED COURT.

B. F. Parks of Aurora, was lately elected Judge of the Court of Common Pleas of Aurora and Elgin. The election was held by authority of an act of the last Legislature, which act also dispossessed the old Judges—A. C. Gibson and C. H. Morgan—of their seats on the Bench. On Monday, Judge Parks attempted to open Court in Elgin, but found one of the old Judges, Morgan, in possession of the docket, and he refused to give it to his lawful successor, alleging feebly enough for a lawyer, that he had been elected for four years, and that no power less than death could shorten the term of his office. A contest between the big-wigs was the natural result. It was maintained with great animation on each side, for a couple of hours, during which time, with a pecuniary recklessness perfectly astonishing in those hard times, they fined each other, several thousand dollars a-piece. After both had become weary of the fun, the Sheriff adjourned the Court during much excitement among the spectators of the scene. The latest advices are to the effect that Morgan has hauled off discomfitted, that Parks is "going it alone;" that all fines have been remitted, and that everybody is jolly.

The Railroad Accident near Bardolph.

Branch of Crooked Creek, 178 Miles from Bardolph,
April 11, 1859.

Editors Press and Tribune:

The down train this morning at 5 o'clock A. M., ran into the stream through the bridge. The engine is in the stream, tender on top, baggage and front of express on opposite bank, one passenger car smashed up fine, and one across where the bridge stood; fireman and engineer both dead; breakman has both legs broken and otherwise injured; conductor hurt but very little. Several passengers hurt, but none seriously, which is most remarkable, as the first passenger coach is broken up badly.

Yours in haste, T. EDWARDS.

P. S.—This place is 32 miles south of Galesburgh.

From Washington.

[Special Dispatch to the N. Y. Tribune.]

WASHINGTON, April 10, 1859.

If the receipts of last week be assumed as the basis for averaging the current quarter, Mr. Cobb's estimates will fall short over four millions. There is every probability now that the new loans must be asked for at the next meeting of Congress. The next House will never be guaranteed, had been subscribed for.

The rumors of Miramon's retreat from Vera Cruz are discredited here. Mr. McLane's arrival may have encouraged Juarez, temporarily, but he had not force enough to defeat the attacking army.

Mr. McLane left Washington, expressing an open sympathy with the Liberals, but will not commit our Government to either until he has arranged the basis of a new treaty. He is not willing to adopt either interest for that object.

Mr. Bowman will begin the new *regime* of the *Union* as Washington Correspondent having finally accepted Mr. Wendell's conditions of transfer, by stipulating sufficient patronage for the purchase, through third parties. The whole affair only transpired last week. The editors are yet selected. Mr. Buchanan directs personally, and Mr. Black will write after his return. Other details are also settled. Mr. Bowman is to run for Printer to the Senate.

About sixty passports have been issued daily for a month past, and probably that ratio will continue till July. None are necessary for England, and thousands are obtained from our Minister at London for continental travel.

THE CITY.

ALMOST AN ACCIDENT.—A woman whose name we could not ascertain fell from Randolph street bridge into the river on Monday evening. Much scared, more wet, but nothing worse for either.

POLICE COURT.—In the Police Court yesterday morning an average crowd in number, of cases average in quality, and all on a minor key were disposed of.

THE SARACAC CASUALTY.—We regret to learn that young Robinson who was injured in the accident the burning of the schooner Saranac died of his wounds on Monday at the City (apology for a) Hospital.

THE HOUSE RAILROAD.—The State street Horse Railroad reached Harrison street yesterday. We are sorry to notice no preparations for a double track as yet. Better now than to wait. It must be eventually.

CONTINUED SALE AT AUCTION OF ALL KINDS OF NEW FURNITURE, &c.—Messrs. Gilbert & Sampson, will continue the sale this morning, at 9½ o'clock, of elegant rosewood, mahogany, and walnut furniture. Also a splendid variety of velvet, Brussels, and ingrain carpeting.

HENRY WARD BEECHER.—The lecture of Rev. Henry Ward Beecher, at Metropolitan Hall, this evening, will be remembered by our citizens, without any reminder. The lecture is for the benefit of the Galesburg Church, as before noticed.

ST. GEORGE'S BENEVOLENT SOCIETY.—A meeting of all desirous of re-organising the St. George's Benevolent Society is called for the Board of Trade Rooms on Friday evening, 15th inst., instead of time and place as formerly given.

RELIGIOUS INTELLIGENCE.—Rev. Bishop Kemper, of Wisconsin, is expected to preach at St. James' Church, this, Wednesday evening, at half past seven o'clock.

Rev. Bishop Lee, of Iowa, will preach at Trinity Church this evening at the usual hour.

THE NEW CUSTOM HOUSE.—The resumption of labor on the New Custom House is among the most welcome signs of the return of spring. This splendid building will, early in the season, be entirely enclosed, having now nearly reached the intended height. It will be "put in commission" next year, until which time probably the Dearborn street improvement, in widening the same from Madison to Monroe, will scarcely take place.

REPLACING THE SWITCH AT HARLEM.—JOHN MCLAUGHLIN HELD FOR THE MURDER OF WM. COMSTOCK.—The McLaughlin case, the testimony and full particulars of which were given in our yesterday's issue was resumed before Justices Milliken and Akin yesterday forenoon when they gave their decision holding the prisoner on trial a charge of murder in displacing the switch at Harlem on the G. & C. U. R. R., whereby the fireman, William Comstock, was killed, his train being thrown from the track.

The evidence for the defence in which it was attempted to prove an alibi was regarded by the court as being too contradictory in its nature to weigh against the testimony of the detectives and others as to distinct statements of the prisoner confessing the charge, especially when these statements were strengthened by the evidence in the prisoner's own language in the answers to decoy letters to the same effect.

The counsel for the defence raised an objection, that there was no malice aforethought proved, as required by the statute to hold a man for murder, inasmuch as the prisoner had threatened to kill the engineer Webber, and the person killed was the fireman, against whom he had no malice. The objection, being merely technical, was overruled, and the prisoner thereafore awaits the action of the grand jury.

THE GREAT BILLIARD MATCH.—The great billiard match between Phelan and Serreiter at Firemen's Hall in Detroit last night, called for a very general sympathy among the lovers of the game and the sporting fraternity in our own city, as well as others along the lines of telegraph, which were the vehicle of frequent dispatches. Betting on this match hereabouts may be characterized as more numerous than *heavy*.

At two points in one city, at least, two of our leading billiard centres, numerous crowds were in attendance to watch the progress of the game as made known by the frequent dispatches.

The match, it will be remembered, was the American full carom game, of 2000 points, for $5000 a side. At the outset Phelan was rather the favorite, with Serreiter's claims well supported, however. As the evening waned the reports gave Phelan crawling up in the figures.

At the last dispatch received before going to press, Phelan had made 1080 points to Serreiter's 919. The latter had done much to close up a larger gap before existing, by a splendid run of one hundred and fifty-seven points!

BOARD OF TRADE—OFFICERS FOR ENSUING YEAR.—On 'Change yesterday the following were announced as officers of the Board of Trade for the ensuing year, by appointment of the Board of Directors:

Seth Catlin, Secretary; George R. Eckley, Treasurer; T. J. Clarke, Inspectors of Liquors, etc.; E. Silver, Inspector of Fish; Thomas Nash, Inspector of Provisions; Wm. Jones, Inspector of Grain; A. F. Dickinson, Flour Inspector.

The following committees were appointed by the President:

Committee on Finance—Stephen Clary, W. Munger, L. P. Hilliard.

Committee on Grain Inspection—Hiram Wheeler, E. B. Stevens, A. Dow.

Committee on other Inspections—Thomas H. Beebe, Geo. Steel, E. W. Denamore.

Committee on Admission of Members.—J. H. Tucker, Geo. W. How, A. S. Burt.

THE RECORDER'S COURT.—In the Recorder's Court yesterday the day was occupied by the continuation and completion of the case of People *ex.* William Deitz, charged with attempting to commit a rape upon Mrs. Catharine Snauble, a German woman, then living on Edina Place near Taylor street, at the time of the alleged offence in July last. Messrs. Cameron and Drummond conducted some eighty pages for the defence of the prisoner, yesterday. C. R. Jones, Esq., closed the case for the People. It was given to the jury last evening.

HOME FOR THE FRIENDLESS.—An adjourned meeting of the Board of Managers, to hear a final report of the Finance Committee appointed to raise the $10,000 building fund, also to consider several plans of the building to be erected, will be held at the Home, this (Wednesday) afternoon at 3 o'clock.

W. B. LOUNSBERY.—My few last words to you will appear in Thursday's issue of this paper. Don't start for the East till you read them.

J. ACE. WRIGHT.

WHAT IS IN ORDINARY PAPER.—Many people have worn out their patience, physical and mental, by neglecting to pay attention to ordinary matters. Few persons would believe that a beautiful, delicate fabric contains a quantum of arsenic, with other chemicals, which, if used to any extent, will communicate poison, and that fatally. The very sheet of paper on which we print contains arsenic. Oil of Vitriol, Chloride of Lime, Potash, Soda Ash, White Clay, Lime, Ultra-marine, or Cobalt Acid. All white paper contains either some or most of these fearful poisons, while colored papers (excepting Gayetty's, which is a pearl color, and made to be as pure as drinking water) are loaded. This state of Potash, Bichromate of Potash, Muriatic Acid, Prussian Blue, Aqua Fortis, Copperas, and a variety of other articles equally dangerous and pernicious, but too numerous to be catalogued here. Physicians owe it to the living generation to caution all purchasers against such deleterious and death-dealing material. Printed paper, everybody knows, is rank poison to tender portions of the body. Individuals would not put printer's ink in their mouths—as one of its ingredients is LAMP BLACK—yet they have no hesitation in allowing themselves and children to lay in bed with sheets of piles of this aggravating item if they exist; by applying that ink to the tenderest part of the body corporate, if we except the eye. How much cheaper, in every respect, is it to use a paper made of the purest material and medicated with the purest of drugs, such as Gayetty's Medicated Paper for the water closet. Depot, 41 Ann street, New York. Sold in Chicago, Illinois, by J. H. Reed & Co.; Sawyer, Paige & Co.; Bolles, Smith & Co.; Buck & Rayner; Gale, Brothers, and others.

TO THE RE-DRUGGED AND POISONED CITIZENS OF ILLINOIS.—You are overrun with a deluge of the direst compounds in the form of "Alcoholic Drinks" that ever emanated from that pest of society, the LIQUOR MIXER. They are sold to you as a luxury, or they are dispensed to you as a medicine, and in either case the effect is the same.

There is but one way to escape, and that is to use as a luxury a medicinal, a safe and reliable stimulant, sold under stamp and seal, which renders it certain that it has not been tampered with. Such an article is the celebrated CHEMICAL GIN, which is distilled under inspection of the British Government, is delicately flavored (unlike any other Gin) with some of the most valuable restoratives of the Vegetable Kingdom, and is by far the most healthy beverage extant.

The most eminent physicians of Europe and America not only recommend its use by the halt and bed-ridden, but prescribe it as a medicine where a stimulant is required.

The female sex will find it not only a pleasant Cordial, but a certain relief in sufferings of a periodical character.

Analytical chemists of all ranks pronounce it perfectly pure, and its restorative merits incomparable.

Sold only in quart and pint bottles by all Druggists, Grocers, etc. Depot, No. 42 Ann street, New York. sp11-2t

BY TELEGRAPH.

Four Days Later from Europe.

ARRIVAL OF THE STEAMSHIP CITY OF BALTIMORE.

NEW YORK, April 12.—The steamship City of Baltimore, from Liverpool March 30, arrived at 5 o'clock this morning.

Nothing definite is known as to the meeting of the Congress. Baden is believed to be fixed upon as the place. England consents to the admission of Sardinia. It was supposed that she would have a seat, but no vote, and the other Italian States the same.

In Parliament, Lord Malmesbury made some explanations with regard to Lord Cowley's mission. He expressed the hope that peace would be maintained. There was less confidence at Paris, Vienna and Berlin where warlike preparations continued. Count Cavour continued at Paris, having frequent interviews with the Emperor. Paris Bourse was depressed—5's closed 68f. and 10c. Reports of the pending French loan was supposed to have some influence in the depression.

The Reform debate in Parliament progressed nightly. The vote is to be taken on the 31st. Ministers state their all on the issue. Liberal journals considered their resignation certain.

The Vienna correspondent of the London *Times* says that although Austria consents to attend the Congress, she has no belief the peace will be maintained, therefore continues her armaments.

The announcement of the Congress had not produced any improvement in the general trade of France. All the war material recently prepared, such as artillery, projectiles, clothing, tents, etc., were to be stored at Lyons and Marseilles.

Paris letter-writers state that armaments were going on in France without relaxation. Government had also decided upon adding a 5th battalion to each 100 regiments of the line. Turin letters say the projected Congress had proved a grievous shock to the war party. Orders for preparing barracks for troops have been countermanded. Count Cavour writes to the Sardinian Ambassador in London, in reply to a question propounded by the British Government, that the storm abated Sardinia to remain defenceless in the case of the provoking and armed attitude of Austria.

It is computed that by the close of March, Austria would have in Lombardy 70 battalions of infantry, which, added to artillery, cavalry, engineers, &c., make her army in Italy number about 220,000 strong.

Letters from Placenza announce that 1,500 Austrians, with 50 cannon and other war munitions, had arrived there. The church had been converted into a flour magazine. Warlike preparations were also going actively forward in other portions of Italy.

It was rumored in Paris on the 28th, that a collision had actually taken place between an Austrian detachment, and some recruits who wished to escape the carvile; one killed and several wounded.

It is officially announced in Germany that the Federal Assembly had voted supplies for arming the Federal fortresses, with Prince Frederick, of Wurtemburg, appointed Commander in Chief of the 8th Federal Corpse.

GREAT BRITAIN.—In the House of Lords on Monday, Lord Shaftesbury's motion for the Earl Clarendon, made a long explanation touching Lord Cowley's mission and the proposed Congress. He said the object of the Congress had not been decided on, although he had no doubt it soon would be. Government was determined that the rights of Italian States should be represented, and their object was to recommend to the Italian people what they believed to be for their own good and the safety of Europe, and although no actual disarrangement had taken place, both Austria and Piedmont had formally declared they would not attack one another, and were reducing their armalities. There is reason to hope, therefore, that peace would not be broken out that the Congress would reach the result which all Europe desired.

The debate on the Reform bill continued. Sir George Packington, who supported the measure, declared that Government would have itself stacked on the issue of the debate.

A deputation had waited on Sir John Packington, on the subject of the Honduras interoceanic Railway. It was stated that a substantial guarantee had offered to construct the Railway for £2,500,000.

THE SICKLES TRAGEDY.

[The telegraph brings us a mass of stuff relative to the Sickles affair, which we condense as follows:—Ed. Press and Tribune.]

WASHINGTON, April 12.—John J. McElhane, a short-hand reporter for the *Globe*, examined for the defence.

He knew Dr. Sickles and Mr. Key. They were intimate personal friends. Had known them long and well. Did not see Mr. Key for ten days before the death. Was not at the top at Mrs. Sickles' house.

J. D. Hooker, knew Sickles and Key. They were gentlemen. Had known Sickles for four years. Mr. S. favored Mr. Key's reappointment by Mr. Buchanan. Was aware of a correspondence between Mrs. Sickles and Key, as the friend of both. Mr. S. subsequently told him that his (S.'s) relations with Key would continue uninterrupted. Mr. Key came to his house on the 23d of January with a little statement of Mr. S. Left her two or three hours, when he returned. Mr. S. had retained Mr. Key's as he planned in a case of defence before the Court of Common Pleas, or as before the first day of the next term. Key was to be counsel for Mrs. Sickles' friends. On the Monday or Tuesday of June, A. D. 1859, Key spoke to him and paper in the case of Mrs. Sickles' friends against Key, and in favor of Mr. and James H. Savage, Dr. W. Harris, Dr. Gunning S. Bedford, as guardian of the property minors, to be submitted to notify the said parties to appear in said Court.

☞ One of the most prevalent, and at the same time troublesome and painful diseases that attend the human family, is Fever and Ague. For a long time the medical world have been continually bringing forth numerous specifics for its permanent cure; but all without effect. Dr. J. Hostetter, an experienced and celebrated physician, has succeeded in furnishing the public with a valuable preparation for the cure of Fever and Ague. The steady and increasing demand lately made for the "Bitters," and the universal success attending its use, has made for it a reputation unsurpassed by any specific of the kind. For the cure of Fever and Ague, Dr. Hostetter's Celebrated Stomach Bitters can and should claim a superiority over any other preparation extant.

DR. CUTTER'S IMPROVED

Skirt Supporter,

Is an Article of Great Utility, which should be

WORN BY EVERY FEMALE.

This Supporter takes the weight of the skirt upon the Shoulders, the proper place, and relieves the stomach and abdomen of the pressure usually endured. Ventilation is secured by the most able Physicians, and to be the greatest cause of the present weakness and pain in the female system. By taking the weight of clothes from off the stomach and bowels, the muscles are allowed to contract and therefore expand the chest and breath more freely. This is the only Supporter ever invented that will fully supply the want of health.

There are few ladies who have worn their clothes supported by the waist who have not realized the faint, and often distressing feeling, and also weakness of body experienced therein. Then why not from others take warning ere it be too late.

THE SICKLES TRIAL.

Most of the large public journals—particularly those of New York—come to us freighted with the unimportant and uninteresting details of the Sickles trial, now in progress in Washington. Not content with the record of facts, reported with due care for the preservation of all the dramatic incidents and situations of the principal scenes, our New York contemporaries almost every morning treat us to a column of editorial reflections, and a supplementary column devoted to comic matters which do not properly come within the inquiry of the court, or which are too trivial for the use of the gentlemen who do the "bricks and mortar"—the leading editorials—for these enterprising dailies. We do not propose to quarrel with the conductors of the journals aforesaid, for thus ministering to the morbid appetites of their readers, who seem to demand that kind of mental pabulum; but to express our astonishment, that so shallow a fellow as Sickles undoubtedly is, can, even on trial for his life, command so large a share of public attention; and we can explain it only by the fact there is a woman in the case. The fact antecedent to the killing is that, we doubt not, which makes the papers sell. The prurience and salacity of the mob are sharpened by expectations of testimony which will justify in their minds the crime committed. They know the tragedy in all its minute incidents. There is not a feature of it with which school-boys who read *Fresh Leslie's Illustrated, The Line-of-Battle Ship*, or that wondrous journal, *The Journal of Harper's Civilization*, is not familiar. The repetition of the bloody details cannot longer interest. It is the lifting of the curtain which now conceals the illicit correspondence—the mystery which envelops that rented house in the unfashionable negro quarter—the unwilling confession wrung from that "youthful and beautiful lady of Italian descent"—these are the details for which the public watch, and which give the news-boys their harvest of pence.

In all this there is much to deprecate and lament, because there is so much that is gross and demoralizing. It reveals a standard of taste and of morals so low, that the election of men like Sickles to places of high official trust, ceases to excite surprise. The constituents are reproduced in the representative. That readers who demand of their newspapers the published details, and the most minute inquiry into the minutiæ of such a case of seduction and murder, as that now being investigated at Washington, should have a Congressman who would not debauch his neighbor's wife or redden his hands with a brother's blood, is due to a cause beyond politicians control.

GREAT IMPROVEMENT IN LOCOMOTIVES.

Mr. James Patrick, the master mechanic on the Chicago, St. Paul and Fond du Lac railroad, has made an improvement in locomotives which gives promise of great economy in wood, and of course in the expense of working our railways. The following notice of the working of an engine with Mr. Patrick's improvement is taken from the Rochester *Democrat* of April 4th:

> On Friday evening last the locomotive engine "I. A. Wilink," Geo. Cole, engineer, left this city with a passenger train for Suspension Bridge, and made the run on time. She returned with another train on Saturday morning, also on time, and in the round trip had consumed only *one cord of wood!* When it is understood that the average consumption of wood for a trip to Suspension Bridge and back is about three cords and a half, the immensity of the saving would be affected by railroad companies, could a locomotive be made equally economical, can be appreciated. Mr. Cole informs us that this extraordinary result is the case of the "Wilink," is due to the use of a new invention by Mr. John Patrick, called a "Variable Exhaust." We are not sufficiently skilled in the mysteries of a locomotive engine, to describe the manner in which this invention works, but it is capable of doing in all cases what it has done for the "Wilink," it will prove a most valuable acquisition to Railroad companies in particular, and to the public in general who live on railroad lines, in the vicinity of which the country is being denuded of its timber to supply the voracious appetite of the iron horse.
>
> We are assured by G. De Witt Robinson, Esq., of the Fond du Lac Railroad, that a test on that road gave even more satisfactory results than the one detailed by the Rochester *Democrat*. An improvement by which hundreds of thousands of dollars will be saved in the management of our railways ought to attract the prompt attention of those who control them.
>
> On the lines of all our roads the forests are rapidly disappearing, and experience has demonstrated that coal can be successfully and more economically used than wood as it is usually burned. The experiments with the "variable exhaust" would seem to prove that wood would again become cheapest. We hope the improvement will at once be thoroughly tested on a large scale, and that the results will fully realize the highest expectations of the ingenious inventor.

WASHINGTON, Friday, April 1, 1859.

As an inducement for the Post-Office contractors to continue the transportation of the mails as heretofore, the President has agreed to recommend the payment of interest on suspended claims. The settled policy of the Government has been not to pay such interest, except in rare cases, to depart from this established rule will put aside many good business into the hands of the lobby, which suffered somewhat in their operation last Winter.

Lord *Lyons*, the new British Minister, called at the State Department this morning, to pay his respects. He will be officially presented to the President on Monday next. Lord Napier looks quite sad.

Considerable distrust is now expressed in some quarters as to the Paraguay news, which is being regarded as a complete surrender to Lopez. But if the reported settlement be true, this will be an unlooked for result, after such a vast expenditure of equipping the expedition. The President, however, believes it, but he has no positive information.

The weekly statement of the Treasury shows a net balance of $8,575,920 45; receipts, $606,885 70; drafts paid, 4,823 67; drafts issued, $1,421,517 81.

Nine and a half millions of acres of the public lands in Kansas and Nebraska which were withheld from sale last year on account of the financial revulsion, will be in market in July, August and September. It is expected that these sales will increase the revenue for the next financial year very materially.

The Flood in the Lower Mississippi.

[From the Vicksburg Sentinel, April 6.]

We have again some bad tidings to announce concerning the all-absorbing topic of the times—the river. On Sunday night, about 11 o'clock, we learn that the Diamond Island levee, completed last year, gave way about a mile below the Castleton break, and we hear from a gentleman residing in that portion of the parish of Madison, that on Saturday morning, also on time, and in the round trip had consumed only *one cord of wood!* When it is understood that the average consumption of wood for a trip to Suspension Bridge and back is about three cords and a half, the immensity of the saving would be affected by railroad companies, could a locomotive be made equally economical, can be appreciated. THE FARM AND GARDEN.

Cultivation of the Sweet Potato—The Variety to Plant.

The cultivation of the sweet potato, until a few years past, was exclusively confined to the South, but by the selection of an early variety produced in Jessamine County, Virginia, the cultivation has rapidly extended North as far as the "dent" corn ripens. This variety is called the

NANSEMOND,

and is invaluable. It not only matures early, but has the additional good quality of being edible at any stage of its growth. We know of no other variety that is worth planting in the north part of the State, and no other equal to it for the south part. For several years past we have annually called the attention of the readers of the FARM AND TRIBUNE to the value of this variety, and cautioned them against the purchase of plants peddled about the country, of the large and, to them, worthless sorts, and we now have the satisfaction of seeing our efforts in this behalf duly appreciated.

Last spring the Chicago market was pretty well glutted with the large, red sweet potato from Kentucky, and the price of these was so much below that of the Nansemond, which had been sent them for seed, that many persons engaged in sprouting the plants for sale, purchased the larger sort, and sold the plants to their customers—some of them, we regret to say, knowing them to be worthless. Others not knowing the difference, purchased them and sprouted for their own use, but only to meet with disappointment. We hope no planter will allow himself to be imposed upon again, but see that he obtains his seed of reliable parties if he sprouts for himself, or his plants from those who will deal honestly by him. We have had our seed for several years of J. W. Toubrock, whose advertisement will be found in the Weekly PRESS AND TRIBUNE. Most of the nurserymen throughout the State have the plants for sale. This year we are sprouting our plants under glass, and expect to have them early in May. We plant from May 15th to June 1st. Our practice is to fall plow the ground, taking wheat or corn stubble of the second crop if we have it, and when ready to plant, throw the ground into ridges with a fourteen-inch plow. By turning two furrows together, this will make ridges about three and a half feet apart. The higher the ridges the better. Set a single plant to a hill, and put them eighteen inches apart—requiring about eight thousand plants to the acre. They should be kept clean, but cutting the ends of the vines and twisting them around the hill is a loss of labor to that extent. On the first hoeing it is a matter of economy to plow the vines along the ridge, so as to be out of the way for one or two subsequent workings with the cultivator, but after that we allow them their own way. In digging, cut off the vines with a sharp spade or hoe, and take them up with the common potato fork.

The best ground is dry, well drained prairie, and if not rich, add well rotted manure, which is to be plowed in at ridging. We expect to set this plant as common in the gardens and fields of Illinois as the common potato, nor have we any fear that the *Discora Battatas* will drive either from our tables.

The Ottawa-French River Canal.

[Correspondence of the Press and Tribune.]

PORT HOPE, C. W., April 7th 1859.

The survey of the Ottawa-French River route was commenced some years ago by Mr. Walter Hawley, C. E., who reported upon it, and estimated the cost of a navigation, in which the locks 250x50x10 ft. at twenty-five millions of dollars. This estimate, it was believed, was not founded on sufficient data; and last year the government added a new survey, or rather a continuation of the old one, to determine the cost with more accuracy. This survey I have the honor to superintend.

Our investigations have confirmed those of previous explorers, that the route is perfectly practicable; and navigation, if improved, would be superior to any now existing, both in point of distance and quality. This may seem a bold assertion, when we consider that with a considerable natural navigation the great lakes afford; but I will show you why. The French and Ottawa rivers are, in reality, not rivers, but a chain of inland lakes, long narrow and deep, and separated from each other by short rapids. Their general length is about thirty miles, width from half a mile to three miles; depth from thirty to one hundred and fifty feet, while the descent from one to the other seldom requires more than two or three locks. Such a navigation as this, would escape the storms and dangers of the great lakes on the one hand, while the delay of lockage would not be more than on existing routes. This route is the most northerly of any yet proposed, but careful observation, extending over a series of years, have shown that the season of navigation is never less than 180 days, against 195 on the Erie, and about 200 on the Welland, while the sublime, at Montreal, is not more than 180.

A comparison of the two routes shows that the distance between Chicago and Montreal by the Welland canal route is

Lake and river	1,397 miles.
Canals	75 "
Total	1,340 "
By Ottawa:	
Lake and river	975 miles.
Canals	50 "
Total	975 "

Difference 373 miles in favor of the Ottawa route, and it is estimated that the ... would be forty-four ... Vantage would be ... eights going West, from ... supplies of lumber on the Ot... are the advantages of this route, ... ony remains to see whether the cost is such that it can be undertaken. If you please you can publish the information contained in this, but put it in a better form as to literary style. Yours, very truly,

ROUTE TO THE MINES.

[From the Iowa City Reporter.]

CORRESPONDENCE SPRINGDALE, Mar. 20th 1859.

EDITOR REPORTER:—Eleven days from Chicago have not decreased my desire one whit, to "see the elephant," but some few (in my company, after a continuous "skinning" begin to feel over over "through lines," and "meals west of the Missouri."

I cannot speak too approvingly of the arrangement for forwarding passengers from Chicago to Ft. Kearney, over the Rock Island, M. & M. Road and Western Stage line. We have made a quick trip here, with prospect of being in the mines within eight days,—no detentions and no humbugery.

We go to Platte Crossing by Stage—thence shall get Moore & Grimes, teams to take us to the mines. I have talked with, advises the *Through Route from Chicago* via C. & R. I. Railroad, and Western Stage Co.'s stages to Kearney. That they will make a quicker and cheaper trip, has been demonstrated in several instances, and if you could hear some of the complaints and charges, you would not wonder at it.

We have been comparing notes, and made distances as follows;—from Chicago to Iowa City, 226; to Omaha, 280; to Kearney, 160; to Columbus, 90; to Lincoln, 50; to Nebraska City, 100;—total, 796 miles. Fare to Kearney $50—to Cottonwood, $8—total $58.

Both routes have thus far failed to furnish meals west of the Missouri, but I was told at Kearney, the Western Stage Co., about April 15th, would start their teams from Kearney, when meals would be furnished west of Omaha. Fare from Chicago to mines $100.

That is certainly cheaper than to undertake to buy one's outfit, ox teams, horses, mules and cattle, are far cheaper in the mines, I am told here, than in the States,—and even if one had to purchase along here, the prices are not very disproportionate to those in the states.

We meet men coming from the mines, nearly every day, and they bring about the same report—more favorable if anything, than what I heard in the States. Occasionally we meet a disappointed one, but very seldom. The returning miners are generally with their own teams, and strike for the nearest point on the Missouri for provisions and tools.

Now my advice to those who are coming through, and want to come quick, and avoid heavy expense for outfit, is to buy tickets to the mines at Kearney, and if you don't like it come back; and then if the mines should not prove paying, he can return and not be over $225 out of pocket. If they prove good, he can pitch in the day he gets there,—have no team to bother him, or houses to build; and there are already any number of boarding houses, (canvas hotels &c.) there, or on the way; and he can get board at reasonable rates, as there is going to be a great competition in providing as well as all kinds of goods. More anon.

Yours truly,

CHARLES WEST.

The Zouave turns up Again.

The *New York* correspondent of the St. Louis *Republican* states that De Rivera, "the gallant Zouave," and hero of the Rhint drama, is still at work in New York, as a confidence man. He recently ran the swindling game off on Col. —, of the U. S. army, who had just returned from a sojourn of several years upon the frontier, and was not, in consequence, well up to the dodges of such gentlemanly rascals as De Rivera, who regulled him with tales of love adventures and criminal warfare, until the Colonel congratulated himself upon having made the acquaintance of one of the most remarkable and best fellows in the world. In a very short time De Rivera managed, under the pretence of assisting the Colonel's "pile," giving him in return a draft upon his brother, "A Banker in Rue something, Paris."

He also, as the Colonel was about journeying southward, gave him a draft upon Mrs. Blunt, his dulcinea, before he left, with the assurance that she would be delighted with the opportunity of cashing it; and to make the transaction perfect in its absurdity, he entrusted to the Colonel's care a letter addressed to "the Countess Emily Arnour Du Rivera."

Through with these documents, the Colonel arrived in Mobile a few days ago, and had actually engaged a conveyance, with the view of paying the Blunt family (who live out of town) a visit, when, fortunately, he bethought himself on the matter to one of his friends, he learned at once that he had been outrageously duped and swindled. He did not introduce himself to the Blunts.

MINNESOTA AFFAIRS.

Banking under Difficulties—Sight at Certain Matters.

[Correspondence of the N. Y. Evening Post.]

ST. ANTHONY, March 30, 1859.

I hardly know what to say of the financial prospects of Minnesota. That with "all the rest of mankind," we have been most inconsistently "short," or, in other words, "hard up" in money matters for the past year and a half, is a fact already well understood the world over. But while other States are recovering from the revulsion of '57, and are exhibiting many signs of renewed prosperity by the revival of legitimate trade and business, Minnesota is pursuing a widely different course, hoping, no doubt to hasten the return of that golden period of two or three years since, without waiting the slow and regular course of other and older communities. At first they expected to secure such a result by the railroad policy adopted a year ago the coming month. In this, however, they have become satisfied they were in error; but, nowise discouraged by one unsuccessful experiment, they have immediately resorted to another, which, to many minds, is sure to succeed, and this policy is a new and general banking system. When, therefore, the railroad companies of this State, disappointed in negotiating their bonds in New York, announced their intention of converting them into currency, a new hope sprung up in the hearts of our people, and they are quite sanguine that what was worthless in Wall street yesterday may be converted into a safe and sound currency to-day. To be sure our business men look with fear and distrust upon the measure, and urge some ugly reasons against such a policy and currency. First, they say that our banking law, which by constitutional provision must receive a two-third vote of the legislature, was amended for the express purpose of allowing them bonds as a banking basis by a vote of only thirty-five in a house of eighty members—not a majority of the members elected even, saying nothing about the two-third constitutional requirement—and therefore the whole thing is illegal. Measures are now taken to bring this point before the Supreme Court for adjudication; and among prominent men there is but one opinion as to what the result will be, and that is, that the "amendment will be declared unconstitutional." Then, again, it is insisted by some that bonds which have travelled through all the money markets of the country, and found no sale at any price, and that have been "spouted" here and there all over the country at fifty cents on the dollar, having no market value whatever, are not a safe basis for currency—and this position appears quite plausible, at least.

At present however, the state railroad bonds are being rapidly turned into currency, the editor receiving them at just such figures as the parties swear they paid for them, which thus far is from ninety-five to ninety-seven cents on the dollar, the company receiving in payment the currency issued upon them. This "railroad money," as it is here termed, passes readily among us thus far, and exchange, in small amounts, on New York, can be procured with it; but for any amount of gold or exchange it is utterly refused even by those who are the principal instruments in putting it into circulation. That this currency is to be short-lived is readily admitted by all; but every person hopes to make it answer their purpose, and be very careful not to have any of it on hand when the crash comes.

There has been much excitement in some quarters within the past few days, in consequence of certain developments in relation to the manner in which our railroad affairs are managed, and the appearance of a new class of operators on the stage.

A few days since, while the Board of Directors of the Transit Company were in session at St. Paul, a Mrs., or Miss ——, formerly, if not now, a resident of Washington, arrived in town, and presented to the board a claim against the Transit Company, of forty-three thousand dollars for services rendered in getting the Land Grant bill through Congress. The lady was informed that her claim would not be recognised, whereupon she employed counsel, who went into the courts and got an injunction restraining the Governor from issuing any more bonds to the Transit Company, &c. She also exhibited to her counsel a copy of a private contract entered into between the directors of that road and the contractors, by which the "contractors agreed to pay over to certain directors eight thousand dollars per mile of the amount they received from the company.

Learning the above, the fair claimant was taking, and that she was possessed of such important papers and secrets, the directors came to the "footlights" and paid her ten thousand dollars in state railroad bonds.

In connection with the above-stated facts it should be known that an extensive change has recently been made in the direction of that company, seven directors resigning, so as to give certain parties the entire control of the road. In consideration of their resignations simply, the seven directors received two hundred thousand dollars in bonds and half in the bonds of the company. I merely state the facts, having no time to draw out the many comments. I may add, however, that our people are quite puzzled to understand how the railroad companies are going to "distribute the resources of the state" by such application of the bonds voted by them to build railroads.

None of our readers will have forgotten the Fort Snelling swindle, by which an "outfit" was said and written, and as the subject has recently been revived here, it may not be amiss to give you the facts briefly brought to city memory. It was insisted by the democratic press of the country that the Fort Snelling sale was a perfectly fair and transparent transaction, and yet appears that certain parties in close communion with the administration, as well as Mr. Franklin Steele, were very anxious to have the matter "hushed up." So much so, that on the first day a hundred dollar drafts to persons connected with certain newspapers. In one case at least, the draft of Edmund Rice, for $2,000 at sight, in favor of the Minesota and Pacific Railroad company, and brother of Hon. M. Rice, on Franklin Steele, for five hundred dollars, was protested for non payment. Mr. Rice and Mr. Steele alleging that the editor to whom it was given, had in violation of the contract, published the sale as a fraud.

Why these persons should pay five hundred dollars each to various parties to "hush up" an honest transaction seems a little curious, but then this is said to be "a curious world," you know.

QUININE SUBSTITUTE,

Or, Nerve Tonic,

WILL CURE FEVER AND AGUE,

Also, Yellow, Chagres and Panama Fevers can often be prevented by the use of this invaluable remedy. The recipe is from a very celebrated, Physician, after thirty-five years experience in Hospitals and private practice in New York City and has been tested in all sections of the United States for the past six years with the most wonderful success. In the Western and Southwestern country, Chills, Fever and Ague prevail, it has accomplished much by curing the disease as well as counteracting the evil consequences produced by the use of Quinine, Morphine and Mercury, or from too free use of the frosty mixture called Ice Water, and is justly lauded upon the unsuspecting health. To all suffering from prostration after disease I recommend the Quinine Substitute as a perfect Tonic. To travellers in unhealthy climates, I would use the words of the well known Captain John W. Munson, now of a Liverpool Packer Line, and many years in the Southern trade, "I never go without it on a long voyage." "I would as soon think of going to sea without a rudder as without the Quinine Substitute."

EYE AND EAR.

DR. UNDERWOOD,

Late Physician and Surgeon to the Opthalmic and Aural Institute of Louisville, Ky., whose reputation is so well known throughout the United States for skill and success as an operator on the EYE and EAR, has now been in this city for six months, during which time he has treated, with a success truly astonishing, ELEVEN HUNDRED and EIGHTY-SEVEN PATIENTS, many of whom had been totally blind for years, and others whose vision was dim and obscure from long continued inflammation of the lids, have been made to see; and others again, who had been entirely Deaf for many years, have been restored to hearing, and several others who have been deaf and dumb from infancy, have been made to hear and speak, as evidenced by letters in the hands of the parties now in this city, and by the testimony of the Doctor's skill and proficiency is that his rooms are continually thronged by the arrival of new patients, not only from this and the adjoining States, but many of them come from distant parts of the United States.

The Doctor never lies, nor will he in future, make any charge for services which he does not perform.

☞ A Word of Warning.—There nothing more despicable than stealing the reputation of a reliable article to impose upon the credulousity in villainous and worthless one, and yet it is often done. Fifteen years ago, Heimstreet & Co. introduced their Restorative under the name of "Inimitable Hair Coloring." Its wonderful restorative properties made it wonderfully popular, and grey and bald heads were likely to become a matter of the past, when the country was flooded with imitations, the use of which was not only useless but absolutely injurious. The original preparation is a scientific combination, which with all and stimulating spirits, affording an agreeable hair-wash, while all the imitations are made of water, making the hair harsh, dry and dingy, regarding, after it dries, the use of oil or wash to make it look decently. We would therefore advise our readers to buy nothing but the original Inimitable Hair Coloring or Restorative, which is reliable.—[True Whig.

☞ A Nuisance—Its Remedy.—"Fellows here dye their hair and beards. A regiment may be encountered any fine day on Broadway with hair dyed and also blacking look which the hair dye gives. Nobody is deceived. A dyed beard looks like the devil, excessively speaking. Every barber has a spice of hair-dye. The quantity of that forlorn sentable sold must be immense."—[New York Tribune.

"That's a fact. You can always tell persons that use hair dyes. It gives the shoe blacking look which cannot be mistaken. We will, however, just whisper to our grey-headed friends who with their 'Crown of Glory' as it was in youth, that Heimstreet's Restorative, acting on the natural secretions at the roots of the hair, restores (not dyes) it to precisely its natural and original color. Try it."—[Troy Whig.

Weekly Review of Chicago Market.

Tuesday Evening, April 19, 1859.

FREIGHTS—During the past week freights have been scarce and rates low. The following are the charters made:

—Prop. Cuyahoga, to Buffalo, with barley at 2½c, and flour at 15c; prop. Adams, wheat to Buffalo at 6½c, and flour at 15c; sch. Marcellus, to Montreal, with corn at 9½c, and flour at 42½c; sch. Barbarian, corn to Oswego at 6c; sch. Britton, wheat to Oswego at 7c; prop. Col. Perry, childs and barley to Buffalo both rates delivered at 10c; Flour is taken to Montreal, via Collingwood and Grand Trunk Railway at 80c. Railroad Freights—The eastern railroads are still carrying fourth-class freight and flour at extremely low rates. Shipments of flour and provisions can almost name their own figures.

FLOUR—Receipts last week, 9,774 bbls; Shipments, 14,450 bbls. The market during the past week has been unusually quiet on Spring Extras, and very few transactions have taken place. Some choice lots have been sold for city use at $5.25@5.50; but ordinary to fair extras have been dull at $5.00@5.20. There has been a fair demand for Winter brands, however, and prices, though rather easier during the greater part of the week, close firm at $5@5.37½ for medium to choice Winter, and $5.40@5.60 extra choice. There has been a good demand for low grade Winter brands to supply the lumber regions, at $5.00. To-day the sales were: 50 bbls choice Spring at $4.87½; 100 bbls fair Winter Extras at $5.25.

WHEAT—Receipts last week, 43,624 bu; Shipments, 73,306 bu. The market during the past week has been dull and inactive, with little or no demand. Sales for milling Winter grades have suffered a decline of 4@5c, and Spring, 2@3c, since our last weekly review. To-day, however, the market is somewhat firmer, and under a fair demand for Spring, 1c of an advance has been established. Winter is nominal and neglected, and the sales show an advance of 1@2c on No. 1 and No. 2 Red, and 3@4c on Rejected. The sales of the week have been as follows:—On the 6th inst., 5,000 bushels changed hands, at $1.00@1.05 for new receipts No. 1 Red; $1.18 for No 2 Red on track; 1.00@1.05 for new receipts Standard Spring; 93@95c for No. 2 Spring; and 75c for Rejected. On the 7th:—3,000 bushels were sold at $1.20@1.25 for No. 1 Red; $1.15@1.17 for No. 2 Red; 1.00@1.05 for new Standard Spring; and 93@95c for No. 2 Spring—all new receipts. On the 8th inst.:—4,000 bushels were sold at $1.20@1.25 for No. 1 Red; $1.15@1.17 for No. 2 Red; 1.00@1.05 for Standard Spring; and 93@95c for No. 2 Spring—all new receipts. On the 9th inst.:—15,000 bushels, at $1.21 for No. 1 Red; $1.11@1.22 for No. 2 Red; $1.00@1.05 for Standard Spring; and 93@95c for No. 2 Spring—all new receipts. On the 11th inst.:—5,000 bushels were sold at $1.26 for No. 1 Red; $1.10@1.11 for No. 2 Red; 95c for new receipts Standard Spring; and 85c for new receipts No. 2 Spring.

To-day the market for winter wheat is a good deal quieter and more demand. Sales were as follows:—Winter, —200 bu No. 1 White at $1.46 free of storage; 200 bu No. 1 Red at $1.40 free of storage; 200 bu do at $1.36 delivered on Mich. Cent.; 200 bushels at $1.30—3c storage; 200 bu do at $1.31—2c storage; 1000 bu No. 2 Red at $1.31—2c storage, to be delivered on the 15th inst.; 700 bu do at $1.32—2c storage; 1500 bu do at $1.31—2c storage; 2000 bu do at $1.30—2c storage; 1000 bu do at 96—3c storage; 700 bu do at 95—3c storage; 1000 bu do at 94—3c storage; 3400 bu do, 3 Spring at 90c—3c storage; 1000 bu do at 89—3c storage.

CORN—Receipts last week, 176,629 bu; shipments, 69,348 bu. The market during the past week has been dull and inactive, under a decline of 2@2½c. The receipts by Canal have been light; but the duties in Eastern markets took shippers out of the field. To-day, however, there has been more activity, under a fair shipping demand, and prices close a shade better than yesterday. The sales during the past week were as follows:—On the 6th inst.: 25,000 bushels were sold at 76c afloat and in store for Prime River Yellow; also in store for No. 1; and 45c in store for Rejected. On the 7th: 14,000 bushels were sold at 76c afloat on the Illinois Canal, 45c f. o. b. for Canal, and 44c for No 1 in store. On the 8th inst., 10,000 bushels were sold at 46½c f. o. b. for Prime River Yellow, and 46c for No. 1 in store. On the 9th, 7,000 bushels at 46c f. o. b. for Canal, and 46c for No 1 in store. On the 11th inst., 70c f. o. b. for Prime River Tajiay, and 46c for No. 1 on track.

To-day the market is quiet and steady. Sales were as follows, as follows: 25,000 bushels Canal mixed at 45c f. o. b.; 15,000 bushels No. 2 at 46c f. o. b.; 4,000 bu do in store at 46c on track; 2000 bu do at 46c on track; 700 bu damp at 44c on track; 2000 bu Chicago Canal on p. s.

OATS—Receipts, last week, 16,591 bu; shipments, 1,310 bu. The market during the past week has been extremely dull. The demand is almost entirely confined to city consumption, and until orders from the interior direction. No. 1 Oats have sold during the week at a range of 29@30c in bags and 31@32c in bulk, according to quality. To-day the sales were 500 bushels good No. 1 at 30c delivered in bags.

RYE—Receipts last week, 120 bu. No shipments. The market quiet and nominal at 60@62c for Canal; and 65c f. o. b. on track. To-day 70 bushels inactively here, and there is a good inquiry.

BARLEY—Receipts last week, 2,000 bushels; shipments, 1,340 bu. The market during the week has been neglected, and we have not had quite sufficient to justify quotations. Yesterday 300 bu No. 2 sold at the free of storage. No. 1 is nominal at 50c. No. 2 is dull at 40@45c. No. 3 is nominal at 35@36c.

ASHES—Pots, 5@5½c.

ALCOHOL—Receipts 30 bbls; shipments 10 bbls. Market unchanged and quiet at 21@22c per gal.

BROOM CORN—Receipts 3,657 lbs.; No shipments. Market quiet and unsettled at $1.00@2.00 for common to good.

BEANS—Receipts last week 60 bu. Market 75@ dull. No shipments, except for city use. Market nominal at 90@.

BUTTER—Receipts last week, 16,842 lbs. There has been a good shipping and city demand for choice roll, at 18@20c. About 500 packages were sold a few days since to go to St. Louis. Common butter dull at 12@14c.

CATTLE—Receipts last week, 1,275; shipments, 350 head. The market during the week week has been firm, with a good shipping demand. Sales at Sherman's Yards to-day were:

4 head, averaging 1,350 lbs at	—@—	$4.25
4 " " 1,250 " "	—@—	4.00
4 " " 1,150 " "	—@—	3.75
